

How To Register A Cropout

American Paint Horse Association

122 E. Exchange Ave., Suite 420 • Fort Worth, Texas 76164

Fax: (817) 834-3152 • apha.com • askapha@apha.com

What is a ‘Cropout’?

A cropout is a horse without a registered Paint parent—both the sire and dam are registered either with the American Quarter Horse Association (AQHA) or Jockey Club (JC). It must be eligible for Regular Registry at the American Paint Horse Association. Double registration can occur when a cropout is also eligible for registration with either AQHA or JC.

To register your cropout foal with APHA, we will need the following items:

1. Foal Information

Registration Application

Complete the enclosed APHA registration application. The original AQHA or JC Breeder’s Certificate may be used by attaching it to the APHA application form.

If the horse is already registered with AQHA or JC, a photocopy of both the front and back of the cropout’s registration certificate from that registry must be submitted as well.

Photographs

Four photographs of the horse must accompany the application: one front view, one rear view, and a direct view of each side. Please do not trim the photographs.

Be sure to include quality close-up photographs of the qualifying area. The qualifying area must be a solid white spot exceeding two (2) inches in the prescribed zone, with some underlying, unpigmented skin.

Parentage Verification

All horses without a Paint parent must be parentage verified using DNA genetic testing prior to registration. If parentage verification has been completed at either AQHA or JC, it may not be necessary to repeat the testing. For parentage verification, the sire, dam and foal must each be tested. If either the sire or dam are unavailable for testing and DNA was not placed on file, registration of the foal may not be possible.

RG-020.A.1.C.1 also requires HYPP on Impresive-bred foals.

2. Sire Information

Stallion Breeding Report

An original stallion breeding report, including the appropriate fees, must be filed by the recorded

owner of the AQHA or TB stallion at the time of breeding. If the sire already has a stallion breeding report on file with APHA for the appropriate breeding year, the filing fee will be the current Add-A-Mare fee.

<u>Fee</u>	<u>Member</u>
<u>Filing Fee</u>	<u>\$10 per report</u>
<u>Mare Fee</u>	<u>\$5 per mare on the report</u>
<u>Add-A-Mare Fee</u>	<u>\$5 per mare</u>

Listing

The sire must be listed with APHA as an eligible sire. To list a stallion with APHA, a Stallion Listing Card must be completed and signed by the recorded owner of the sire at the time of breeding. A photocopy of the AQHA or JC registration certificate (front and back, showing complete ownership record) must be sent to APHA. If the stallion is listed but ownership has changed, the new owner must submit a new listing card and photocopy of the registration certificate showing the ownership change. If the ownership history of the stallion cannot be verified by the registration certificate or the respective breed registry, listing of the stallion may not be possible making his foals ineligible for registration.

<u>Fee</u>	<u>Member</u>
<u>Listing Fee, one time for life of stallion</u>	<u>\$75</u>
<u>Ownership Change</u>	<u>Free</u>

DNA

All breeding stallions must be DNA genetic tested. To request a DNA genetic test kit for your stallion, contact the APHA MemberCare Department. If a stallion’s DNA genetic markers are already on file with an APHA-approved laboratory, it may not be required again if the owner of record provides APHA with a copy of the genetic markers. All horses approved for cropout registration must have their DNA color/pattern panel completed at an APHA-approved lab.

3. Dam Information

A photocopy of the dam’s AQHA or JC registration certificate, both front and back showing the complete ownership record, must be submitted to APHA. If the ownership history of the mare cannot be verified by the registration certificate or the respective breed registry, registration of the foal may not be possible.

The recorded owner of the dam at time of foaling must sign the APHA registration application.

However, if the cropout is already registered with its respective breed registry, the current recorded owner of the cropout (as recorded on the AQHA or JC registration certificate), can sign as Original Owner of Foal, on behalf of the original owner.

Mare Enrollment

A QH or JC mare must be enrolled with APHA in order to produce registered Paint foals.

A mare enrollment fee will be assessed for any QH or JC mare that is a first time Paint foal producer. The fee will be charged to the first foal registered with APHA regardless of age.

<u>Fee</u>	<u>Member</u>
<u>Mare enrollment Fee, one time for life of the mare</u>	<u>\$25</u>

4. Transfer of Foal Information

If the current owner of the cropout is different than the recorded owner of the dam at the time of foaling, a transfer report must accompany the application. The transfer section of the APHA registration application may be used or a separate transfer form, completed in its entirety, can be attached.

In the case of a double registered cropout, if the current recorded owner signed as the Original Owner of Foal, they can complete and sign the transfer section on behalf of the original owner.

<u>Fee</u>	<u>Member</u>
<u>Transfer Fee</u>	<u>\$25</u>

5. Other Information

Membership

The recorded owner of the dam at time of foaling, or the resultant owner if a transfer is submitted, must be a current member in the exact same name or nonmember fees will be charged. A membership should be purchased to receive reduced fees on transactions.

Registration Fee

The registration fee is based on the age of the horse at the time the application is submitted. The age of a horse is computed by the calendar year starting on January 1 of the year foaled.

If you have any questions, refer to the fee schedule in the current *APHA Rule Book*, online at apha.com or call APHA MemberCare at (817) 222-6423 or email askapha@apha.com.
