Stallion Breeding Reports must be postmarked by November 30th of the breeding year. Postal Meters not accepted. For stallions standing south of the equator, this report must be filed on or before the 31st of May of the breeding year.

The stallion must be listed with APHA for breeding and have DNA genetic markers and health panel testing on file prior to the registration of foals. You may order a DNA genetic test kit below.

- Paint stallion owners should list all mares exposed, whether Paint, Thoroughbred or Quarter Horse. Thoroughbred or Quarter Horse stallions will only report Paint mares.
- If the mare did not conceive using one method and she was rebred to the stallion using some other method, each different exposure should be listed on the report.
- If pasture bred, give the date the mare was turned into the pasture and the date she was taken out of the pasture. Give exact date(s) bred – if more than one service is received by a given mare using the same method, be sure to list the first and last dates of exposure. (When issuing a Breeder's Certificate to mare owners, be sure the dates correspond with those reported on this form).
- Specify method of breeding: P = Pasture, H = Hand, A = Artificial Insemination, S = Transported Semen, F = Frozen Semen, E = Embryo Transfer**
- Release of Breeding:** If all mare owner requirements and financial obligations have been met, you can release the breeding by initialing the Release of Breeding column. Your initials will authorize APHA to register the foal without your signature on a Breeder's Certificate.
- Stallions must have their 6-panel genetic health test results (HYPP, HERDA, GBED, MH, PSSM1 & OLWS) on file before foals born in 2019 and beyond can be registered.
