Why do you want to be and APHA State Director?

There is a current disconnect between APHA and my state. While APHA has a lot of information available I feel it is the job of the State Director to get the information to the club there needs to be better communication between State Directors and the local level. The only way to improve this is to step up. In my tenure as INPHC President I have actively worked to improve relationships with the other clubs in our zone I have also worked to bring new people into our club and encouraging people to become more active.
